Report:

Vandaree Motel, a website, promises its guests a comfortable and relaxing stay. Because Montserrat fonts have a formal appearance that fits hotel kinds and are simple for people to read, they are used on this website. The website's home page has a green(008000) header that quickly grabs the visitor's attention. The term "Vandaree Motel" is written with the letters V in the color green and the letter M in the color blue to indicate an eco-friendly hotel. The font size is 30. The header contains the name of Vandaree Motel on the right side of it which has a modern and sleek design. The header is well-organized, with four tabs and the font size of 20 i.e. - Home, Contacts, Gallery, and About - placed on the right-hand side and there is a small logo . This makes navigation around the website easy and user-friendly. The header of my website isn't a line, it's a rectangle shape.

On the left-hand side of the body, the "Welcome to Vandaree Motel" message is displayed, which gives the visitor a warm and friendly welcome and the text color is white and blue which resembles peace and the font size is 70 in it. There is also a "Book Now" button, which is prominently displayed on the homepage with the font size of 25. This is a call-to-action button that encourages visitors to book a stay at Vandaree Motel. The button is large and stands out from the rest of the page, making it easy to find and click and it is covered with a green line. The body of the website contains an image of the Vandaree Motel, which showcases the beauty and charm of the property. The image is high-quality and captures the essence of the motel, making it look inviting and cozy.

The footer of the website contains the color(165AA5) and the name of Vandaree Motel is displayed along with links to its Facebook and Instagram pages. This is a great way for the motel to connect with its customers and engage with them on social media. Additionally, there is

lettering with the following information: "Copyright 2022 Vandaree Motel.inc.All rights reserved" in font size 13, "Your comfort is our priority," and a little green line below that in font size 18.Visitors can more easily read and distinguish key elements of a hotel website thanks to the font size.

The Hotels page of the website features a bold and eye-catching header and footer that match those of the Home page. In body the main headline on this page, which reads "Hotels" in a large font size of 60, draws attention to the page's content. The use of green color in the letters "t" and "e" adds a pop of color and visual interest.Below the headline, the website provides a brief description of the types of hotels available, ranging from standard to super-deluxe. This information is presented in a font size of 14, making it easy to read.The main body of the page consists of four rectangle containers that display information about the different types of rooms available at the hotels, along with their respective prices. The use of a midnight color for the containers creates a sleek and modern look, while the font choices and layout make the information easy to navigate.

The header and footer on the website's Gallery page are identical to those on the Home page. The body of the page's primary title, "LATEST GALLERY," is written in a huge font size of 60 and is colored green.Ten rectangular containers that exhibit information, features, and hotel services make up the body of the Gallery page.The hotel is in a lovely position and offers lovely meals, clean accommodations, and a tranquil environment.Additionally, in this container, these features and services are briefly discussed while a picture is shown. The Hotels page of the website is well-designed and user-friendly, providing visitors with important information about the available accommodations in a clear and concise manner.

The About page on the website features the same header and footer as the other pages, providing a cohesive look and feel to the website. The body of the page begins with a large hotel logo on the left side, which serves as a visual representation of the brand.In the middle of the body, the text "GET TO KNOW US" is displayed in a bold font size of 50 in black color. Below this, the word "splendid" is written in a font size of 25, with a short green line serving as an underline. This simple yet elegant design creates a professional and sophisticated look for the website.The text below the underline highlights that Our hotel provides a luxurious and welcoming experience that caters to all types of guests, from backpackers to families. Beyond just a place to stay, we offer a vibrant community where you can meet new people and feel at home.The font size of 25 makes the text easy to read, while the white background adds a sense of clarity and cleanliness to the page.The About page is designed to provide visitors with an introduction to the hotel's brand and philosophy. The use of a large logo and bold text draws attention to the most important information, while the simple and elegant design creates a professional and welcoming atmosphere.

Overall, the Vandaree Motel website is well-designed and user-friendly. The green color of the header is refreshing and pleasant to the eye, and the logo of the motel is modern and sleek. The navigation tabs are well-placed, making it easy for visitors to find what they're looking for.

The "Welcome to Vandaree Motel" message and the "Book Now" button are effective in encouraging visitors to book a stay at the motel.

The image of the Vandaree Motel in the body of the website is a great touch, as it showcases the beauty of the property and entices visitors to stay there. The "Book Now" button in the body of the website is convenient, as visitors can easily make reservations without having to navigate to another page.
